METHODOLOGY

This Snow Sports Participant Report is derived from data produced by the Physical Activity Council (PAC), a partnership of six of the major trade associations in US sports, including the International Health, Racquet & Sportclub Association, the National Golf Foundation, the Outdoor Foundation, the Sports and Fitness Industries Association, the Tennis Industry Association and SnowSports Industries America. The overall aim of the data produced is to establish levels of activity and identify key trends in sports, fitness and recreation participation in the US.

During January and February of 2014, a total of 19,240 online interviews were carried out with a nationwide sample of individuals and households from the US Online Panel of over one million people operated by Synovate/IPSOS. A total of 7,528 individual and 11,712 household surveys were completed. The total panel is maintained to be representative of the US population for people ages 6 and older. Over sampling of ethnic groups took place to boost response from typically under responding groups. During April and May, another 19,000 interviews were conducted on seasonal participation. The 2014 participation survey provides a high degree of statistical accuracy. All surveys are subject to some level of standard error—that is, the degree to which the results might differ from those obtained by a complete census of every person in the US. A sport with a participation rate of five percent has a confidence interval of plus or minus 0.31 percentage points at the 95 percent confidence level. This translates to plus or minus four percent of participants.

A weighting technique was used to balance the data to reflect the total US population ages six and above. The following variables were used: gender, age, income, household size, region, population density and panel join date. The total population figure used was 290,001,000 people ages six and older. Snow Sports participant numbers were subjected to triennial rolling average summation to ensure accurate results in smaller categories and demographic projections.

Additionally, The results of this study were validated by correlation with retail data (SIA RetailTRAK™ produced by the Leisure Trends, an NPD Group Company), sales and orders data (aggregated by Sports Marketing Services for SIA), and skier rider visit data (from the Kottke End of Season report produced by the National Ski Areas Association).

KEY FINDINGS

- The 2013/2014 season brought out 18,999,000 snow sports participants into the cold, down 1%.
- Snowboarders participated the most this season, averaging 8.4 days.
- California is home to more snow sports participants than any other state.
- Close to 9 million people identify themselves as a snow sports participant, but didn't make it to the slopes last season; up 36% from last season.
- Snowboarding brought out the most kids last season, with 26% of snowboarders under age 17; alpine ski (23%) and freeski (21%) were close behind.
- Forty percent of core alpine skiers (9+ days) are under age 17, up 20% from last season.
- Women represented 44% of cross country skiers and snowshoers last season; more than any other snow sport.

PARTICIPATION DEMOGRAPHICS

SNOW SPORTS PARTICIPANT PROFILE

Total Number of Snow Sports Participants (All Disciplines)	27,977,000
Total Number of Active Snow Sports Participants in 2013/2014	18,999,000
Total Number that Identify as Participants but did not Ski/Ride in 2013/2014	8,978,000
Average Age	16% ages 6-12, 10% ages 13-17, 15% ages 18-24, 22% ages 25-34, 16% ages 35-44, 12% ages 45-54, 6% ages 55-64 and 3% over 65
Gender of Participants	57% Male, 43% Female
Percent of Participants with a Bachelor's Degree or Higher	63%
Percent with Household Income >\$75K	55%
Most Popular Snow Sports Activity	Alpine Ski (9,004,000 Participants)
State with Most Participants	California
State with Most Participants Per Capita	Idaho
Most Common Reason for Not Participating	Poor Weather
Most Common Non-Snow Sport Crossover Activity	Walking for Fitness

ALPINE SKI PARTICIPANT PROFILE

Total Alpine Ski Participation	9,004,000
Age	23% are between 6-17, 56% are ages 18-44, 19% are 45-64 and 2% are 65+
Gender	59% Male, 41% Female
Percent with Head of Household Income >\$75K	63%
Percent of Core Alpine Skiers with Head of Household Income >\$75K	65%
Percent with Bachelor's Degree or Higher	56%
States with the Most Alpine Skiers	CA, NY, TX, CO, MI
Percent of Alpine Skiers that also Snowboard	23%
Average Price Paid for Flat Skis (without bindings) at a Specialty Shop	\$397.23
Average Price Paid for Ski Systems at a Specialty Shop	\$432.29
Average Price Paid for Alpine Boots at a Specialty Shop	\$320.02
Average Number of Days Participated	7.8

Note: average retail prices include carryover.

CROSS COUNTRY PARTICIPANT PROFILE

Total Cross Country Ski Participation	4,291,000
Age	16% under 17, 14% between 18 and 24, 46% ages 25-44, 21% 45-64 and 3% 65+
Gender	56% Male, 44% Female
Percent with Head of Household Income >\$75K	53%
Percent with Bachelor's Degree or Higher	57%
Region with the Most XC Skiers	Pacific
Percent who also Alpine Ski	41%
Average Price of XC Skis at a Specialty Shop	\$173.85
Average Price of XC Boots at a Specialty Shop	\$118.34
Average Number of Days Participated	7.2

SIA/Physical Activity Council 2014 Participation Study. ALL RIGHTS RESERVED.

FREESKI PARTICIPANT PROFILE

Total Freeski Participation	4,061,000
Age	21% under 17, 48% between 18 and 34, 20% ages 35-44 and 11% over 45
Gender	59% Male, 41% Female
Percent with Head of Household Income >\$75K	56%
Percent with Bachelor's Degree or Higher	53%
Region with the Most Freeskiers	Pacific
Percent who also Alpine Ski	49%
Most Popular Activity Off-Snow	Road Biking (45%)
Average Number of Days Participated	7.5
