How do we do it?

How do we do it? We collect point-of-sale (POS) data from over 220,000 doors plus including both e-commerce and mobile platforms. We collect millions of receipts from brick-and-mortar and e-commerce (Checkout) and field more than 12 million consumer surveys each year – to tell our clients what, where, and why consumers are buying. We bring those robust data assets along with our industry expertise and combine it with your data or third party data to address your business issues, from opportunity identification to program evaluation.

How We Help Our Clients

- We measure markets to help our clients benchmark performance, identify opportunities, diagnose issues, and make strategic decisions to drive growth. We track sales, distribution, share, and velocity, covering all channels in the evolving retail landscape. We follow the same consumers over time for insight into shifting tastes and trends.
- We predict areas of risk and growth by combining weekly store-level POS data, best-in-class data modeling, and industry expertise. This enables our clients to take much of the guesswork out of investment decisions in product development and marketing.
- We provide strategic counsel on business strategy and product, marketing, and sales opportunities. NPD analysts have access to all of our databases across more than 20 industries spanning product sales, consumer shopping behavior, and ownership and usage information.
- We use prescriptive analytics to help our clients improve performance by identifying and targeting buyers, showing dollar value of their brands, and evaluating and guiding pricing and promotion decisions.

Point-of-Sale Data Methodology

The NPD Group collects point-of-sale data from selected retailers for its US Snow Industry View Tracking Service. This data is the actual sales from the retailer/data partner on an item-level basis.

A robust product dictionary, maintained by NPD, catalogs each item to the appropriate NPD Category. As new files are processed, items that exist in the dictionary are matched and coded with their appropriate classifications. Any new items that are not in the dictionary are added and catalogued appropriately. The US Snow Industry View POS service currently tracks items across 13 categories, 224 subcategories, and 54 attributes, spanning the Winter/Snow Sports Specialty Accessories, Apparel, and Equipment segments.

While NPD partners with a large number of key retailers/data partners, not all retailers/data partners are included in the data. Based on the set of participating retailers/data partners, NPD has defined universes that include both participating and non-participating retailers/data partners. NPD has identified the total market for each business and is confident that the set of participating retailers/data partners can represent that market.

NPD projects the data it receives from its retail/data partners to a larger universe that includes stores that are not included in the panel. The projections are designed to estimate the total size of the channel, as well as estimate the overall brand distribution within the channel. Please note that projections may not accurately represent market trends within non-panel retailers/data partners, as the market trend is dictated by our retailer/data partner sample.

To protect the confidentiality of our partners' sales information, methodologies are implemented onto our point-of-sale data at an item level. Volume for suppressed items are included in the total volume and will be reflected in an "All Other" line item. For products reporting at the regional or DMA level, data must meet more stringent releasability requirements in order for the data to be included in the reported data set. Details can be found on subsequent tabs.

Our clients value consistency in our data, but also expect and deserve continuous improvement, as we strive to provide the most up to date, trendable data available in the marketplace. Upgrades allow NPD to systematically address marketplace or methodology changes, ensuring clients have the best information at hand when making critical business decisions. While general maintenance on the data happens continuously, we reserve larger-scale changes for pre-defined periods of the year so that we can prepare for these often complex changes internally, and prepare our clients externally.

Typically updates that would be included in an upgrade would be things like retailer additions or removals from our POS panel and changes to POS or Consumer methodology.

The final POS dataset is then reviewed and validated for proper item classification as well as expected sales trends. Once the dataset has been approved, it is made available to clients.

Data is based on the National Retail Federation 4-5-4 Calendar.

Apparel	Total Apparel Accessories	Total Apparel Accessories	Total Handwear	Gloves	Gloves: A glove is a garment covering the whole hand. Gloves have separate sheaths or openings for each finger and the thumb; if there is an opening but no covering sheath for each finger they are called "fingerless gloves".
Apparel	Total Apparel Accessories	Total Apparel Accessories	Total Handwear	Mittens	Gloves which cover the entire hand but do not have separate finger openings or sheaths are called mittens. Generally, mittens still separate the thumb from the other four fingers. Mittens have higher thermal efficiency than gloves and are common on ski slopes as they provide extra warmth as well as protection from injury. A hybrid of glove and mitten also exists, which contains open-ended sheaths for the four fingers (as in a fingerless glove, but not the thumb) and also an additional compartment encapsulating the four fingers as a mitten would. This compartment can be lifted off the fingers and folded back to allow the individual fingers ease of movement and access while the hand remains covered.
Apparel	Total Apparel Accessories	Total Apparel Accessories	Total Handwear	Mitten Liners	Glove/Mitten Liners: Glove liners are thin, supple gloves that are worn inside regular gloves. They can be designed to provide an extra layer of protection against injury, to absorb perspiration, and to increase the warmth of the gloves.
Apparel	Total Apparel Accessories	Total Apparel Accessories	Total Headwear	Beanies	A beanie or skully is a head-hugging brimless hat. They can be worn either tight to your head or slouchy for a different look. They are generally made of knit & wool materials.

They can be made of wool, fleece or other fibers. Types of hats included in the category are Funky Hats, 'Pom-Pom' Hats, Fedoras, Sun Hats, Bucket Hats, Beret's, Trapper Hats & Cloches. We are also taking visors in the category
